DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification does not define the term "computer useable medium" or "computer readable medium."

Claim Objections

2. Claims 26 and 28 are objected to because of the following informalities: the preamble states "a computer program product comprising a computer **useable** medium, wherein the computer **readable** medium when executed on a computer causes the computer to..." The examiner believes this is a mistake and that "useable" should be "readable" or vice versa, as it is clear that it is the same medium. Appropriate correction is required. Claim 28 depends from claim 26 and inherits its deficiencies, as it should also use either readable or useable, depending on which term Applicant uses in claim 26.

Allowable Subject Matter

3. Claims 1, 4-6, 8, 9, 11-14, 16, 18-23 and 25 are allowed. Claims 26 and 28 would be allowed if the minor informalities are resolved in the corresponding claim objections.

4. The following is a statement of reasons for the indication of allowable subject matter: No prior art of record teaches executing a plurality of fast replication operations comprising creating a snapshot set defined by metadata in the metadata buffer, the snapshot set including an auto-select target indicator indicating whether the target volume for a plurality of fast replication operations is to be automatically selected or manually specified via a target volume indicator and a target extents indicator and a partial volume indicator configured to indicate whether either an entire volume or a partial volume is to be snapshot.
